Topics are continued on back

The Maryland Master Gardener mission is to educate Maryland residents about safe, effective and sustainable horticultural practices that build healthy gardens, landscapes and communities. Our vision is for a healthier world through environmental stewardship.

The Montgomery County Master Gardener organization is a volunteer group trained in the basics of plant physiology, soil science, entomology, and plant pathology with instructional material provided by the University of Maryland. Master Gardener speakers are available to speak on a wide range of gardening topics to the homeowner and student. If you do not see the topic you are interested in please let us know and we will try to accommodate you. We are open to new ideas and topics.

There is no charge for presentations given within Montgomery County. We are a non-profit volunteer group associated with the University of Maryland Extension program.

The Master Gardener Program accepts donations to help support our programs and activities. Donations are tax deductible.
